

August 25, 2008

Dear Mr. Cornish,

Recently the Town of Narragansett had the pleasure of doing business with your company, Underwater Solutions Inc., in which you inspected and cleaned our 3 water storage tanks via divers. I must say that I was very impressed and satisfied with the services your company provided us. Your team of divers conducted themselves in the utmost professional manner while working at our facilities. I now have a new respect for the work that they do each day. I didn't realize how much prep work was involved before the divers actually went into the water until after watching them work the first day. And seeing how they keep their equipment and work ethic I knew they were a knowledgeable and professional team of divers.

Exactly one week from the start of the cleanings and inspections I received the reports on each water tank, once again I was impressed. The reports were complete, very well done and full of helpful information and comments about each tank.

Please let the dive team know that I enjoyed working with them and appreciate the hard work they did for us. I look forward to working with your company in the future on our next inspection/cleaning project.

In closing, I found your services to be money well spent. You brought things to our attention that otherwise would have gone unnoticed.

Sincerely,
Ed Sylvia, Water Superintendent
Town of Narragansett
